MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 267

NUMBER 1, NOVEMBER 15, 1988

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

- A Mitochondrial Chemiluminescence Evoked by a Novel Mixed Copper(II)-Cyanide Complex/Acetaldehyde Cyanohydrin Chelate: A Kinetic Analysis Suggesting a Role for Membrane-Bound Vicinal Sulfhydryls
Richard H. Steele, Jean Sabik, Ruth R. Benerito, and Sean W. O'Dea 125
- Ferredoxin-NADP⁺ Oxidoreductase Is the Respiratory NADPH Dehydrogenase of the Cyanobacterium *Anabaena variabilis*
Siegfried Scherer, Irene Alpes, Heike Sadowski, and Peter Böger 228

COMMUNICATION

- The Inhibition of Protein Synthesis by IgG Containing Anti-ribosome P Autoantibodies from Systemic Lupus Erythematosus Patients
Dennis W. Stacey, Susan Skelly, Thomas Watson, Keith Elkon, Herbert Weissbach, and Nathan Brot 398

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

- Dual Action of 2-Decynoyl Coenzyme A: Inhibitor of Hepatic Mitochondrial *trans*-2-Enoyl Coenzyme A Reductase and Peroxisomal Bifunctional Protein and Substrate for the Mitochondrial β -Oxidation System
Mahmoud N. Nagi, Lynda Cook, Juan C. Laguna, and Dominick L. Cinti 1
- Analysis of the Galactosyltransferase Reaction by Positional Isotope Exchange and Secondary Deuterium Isotope Effects
Sung Chun Kim, Amar N. Singh, and Frank M. Raushel 54
- Effect of Thiouracil in Modifying Folate Function in Severe Vitamin B₁₂ Deficiency
James N. Keating, Gabriella Kusano, and E. L. R. Stokstad 119
- Purification and Characterization of an Extracellular Endoglucanase from the Marine Shipworm Bacterium
Richard V. Greene, Harold L. Griffin, and Shelby N. Freer 334

GLYCOPROTEINS AND GLYCOLIPIDS

- Rat Epididymal α -D-Mannosidase: Purification, Carbohydrate Composition, Substrate Specificity, and Antibody Production
D. R. P. Tulsiani, Vera D. Coleman, and Oscar Touster 60
- A Rat Liver Lysosomal Membrane Flavin-Adenine Dinucleotide Phosphohydrolase: Purification and Characterization
Hae Ja Shin and John L. Mego 95
- Isolation of *in Vivo* Radiolabeled Proteoglycans from Rat Lung
Vladimir Vilim 143
- Glycoprotein Biosynthesis in B Lymphocytes: Induction of Protein N-Glycosylation, RNA Synthesis, and DNA Synthesis by Phorbol Ester plus Ionomycin Is Blocked by Protein Kinase Inhibitors
Jeffrey S. Rush, E. Charles Snow, and Charles J. Waechter 305

- A Novel Sialylhexasaccharide from Human Milk: Purification by Affinity Chromatography on Immobilized Wheat Germ Agglutinin
Maria T. Tarrago, Karen H. Tucker, Herman van Halbeek, and David F. Smith 353

HORMONE STRUCTURE AND FUNCTION

- Radioligand-Dependent Differences in the Molecular Properties of the Mouse and Rat Hepatic Aryl Hydrocarbon Receptor Complexes
J. Piskorska-Pliszczynska and S. Safe 372

LIPIDS AND PROSTAGLANDINS

- Demonstration That the Enzyme that Converts Precursor of Apolipoprotein A-I to Apolipoprotein A-I Is Secreted by the Hepatocarcinoma Cell Line Hep G2
Celina Edelstein, Michael Kaiser, Giovanna Piras, and Angelo M. Scanu 23
- Physiological Regulation of Acetyl-CoA Carboxylase Gene Expression: Effects of Diet, Diabetes, and Lactation on Acetyl-CoA Carboxylase mRNA
Michael E. Pape, Fernando Lopez-Casillas, and Ki-Han Kim 104

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

- Activation of the Ca^{2+} Release Channel of Skeletal Muscle Sarcoplasmic Reticulum by Caffeine and Related Compounds
Eric Rousseau, Jeffrey LaDine, Qi-Yi Liu, and Gerhard Meissner 75
- Further Characterization of Calpain-Mediated Proteolysis of the Human Erythrocyte Plasma Membrane Ca^{2+} -ATPase
Kevin K. W. Wang, Basil D. Roufogalis, and Antonio Villalobo 317

MEMBRANES, CELL SURFACES, AND RECEPTORS

- Characterization, Localization, and Biosynthesis of Acetylcholinesterase in K 562 Cells
Roberto Ravazzolo, Cecilia Garré, Giovanna Bianchi-Scarrá, Renata Barresi, Guido Damiani, Valeria Capra, and Franco Ajmar 245
- Biochemical Analysis of a Human Epithelial Surface Antigen: Differential Cell Expression and Processing
Immac J. Thampoe, Jennifer S. C. Ng, and Kenneth O. Lloyd 342

OXYGENASES, MICROSOMES, AND P450 REACTIONS

- Aromatase and Nonaromatizing 10-Demethylase Activity of Adrenal Cortex Mitochondrial P-450_{11 β}
Katsuko Suhara, Kensaku Ohashi, Katsushi Takahashi, and Masayuki Katagiri 31
- The Metabolism of Xenobiotics and Endogenous Compounds by the Constitutive Dog Liver Cytochrome P450 PBD-2
David B. Dwignan, I. Glenn Sipes, Paul J. Ciaccio, and James R. Halpert 294

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

- Effect of Enzymatic Methylation of Yeast Iso-1-cytochrome *c* on Its Isoelectric Point
Kwang Sook Park, Blaise F. Frost, Sook Shin, In Kook Park, Sangduk Kim, and Woon Ki Paik 195

Influence of the Guanine Nucleotide Phosphorylation State and of Mg^{2+} Ions on the Interaction of Vinzolidine/Tubulin 6 S: A Fluorescence Quenching Study <i>Flora Codaccioni, Monique Dell'Amico, Madeleine Bourdeaux, Claudette Briand, and Béatrice Lux</i>	236
---	-----

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Selective Inhibition of Chlorophyll Biosynthesis by Nicotinamide <i>Yuzo Shioi, Michio Doi, and Béla Böddi</i>	69
Purification and Characterization of Prephenate Aminotransferase from <i>Anchusa officinalis</i> Cell Cultures <i>Wanchai De-Eknamkul and Brian E. Ellis</i>	87
Analysis of the Near-Ultraviolet Absorption and Circular Dichroic Spectra of Parsley Plastocyanin for the Effects of pH and Copper Center Conformation Changes <i>Stewart R. Durell, Elizabeth L. Gross, and James E. Draheim</i>	217

PROTEIN STRUCTURE AND FUNCTION

Affinity Labeling of <i>Saccharomyces cerevisiae</i> Phosphoenolpyruvate Carboxykinase with the 2',3'-Dialdehyde Derivative of ATP <i>Claudia Saavedra, Sandra Araneda, and Emilio Cardemil</i>	38
Instability of Purified 9-kDa Porcine Intestinal Calcium-Binding Protein in the Absence of Calcium <i>Ann Randolph and Kenneth G. Strothkamp</i>	46
Purification and Properties of the Catalytic Domain of Human 3-Hydroxy-3-methylglutaryl-CoA Reductase Expressed in <i>Escherichia coli</i> <i>Ruth J. Mayer, Christine Debouck, and Brian W. Metcalf</i>	110
Analysis of the Secondary Structure of Hirudin and the Mechanism of Its Interaction with Thrombin <i>Sensuke Konno, John W. Fenton II, and German B. Villanueva</i>	158
Purification and Biochemical Characterization of the Rabbit Pulmonary Glutathione S-Transferase: Stereoselectivity and Activity toward Pyrene 4,5-Oxide <i>Cosette J. Serabjit-Singh and John R. Bend</i>	184
Physical and Chemical Characterization of a Horse Serum Carboxylesterase <i>Juan L. Torres, Robert S. Rush, and A. Russell Main</i>	271
Cryoprotection of Antibody by Organic Solutes and Organic Solute/Divalent Cation Mixtures <i>Kevin C. Hazen, Lucille D. Bourgeois, and John F. Carpenter</i>	363
Kinetic Models for Association of 2,3,7,8-Tetrachlorodibenzo- <i>p</i> -dioxin with the Ah Receptor <i>Nigel J. Bunce, James P. Landers, and S. H. Safe</i>	384

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Maturation of Asparagine-Linked Oligosaccharides in <i>Dictyostelium discoideum</i> Analyzed with Modification-Specific Probes <i>Howard S. Judelson and Randall L. Dimond</i>	151
Further Studies on Rat Cathepsin E: Subcellular Localization and Existence of the Active Subunit Form <i>Satoshi Yonezawa, Koshu Fujii, Yukari Maejima, Koichi Tamoto, Yoki Mori, and Norio Muto</i>	176
Evidence That Human Rheumatoid Synovial Matrix Metalloproteinase 3 Is an Endogenous Activator of Procollagenase <i>Akira Ito and Hideaki Nagase</i>	211
Ananain: A Novel Cysteine Proteinase Found in Pineapple Stem <i>Andrew D. Rowan, David J. Buttle, and Alan J. Barrett</i>	262

Analysis of Thiolester Bond Cleavage-Dependent Conformational Changes in Binary α_2 -Macroglobulin-Proteinase Complexes	<i>Paul A. Roche and Salvatore V. Pizzo</i>	285
<i>In Vitro</i> Translation of the Protease Catalyzing <i>Bombyx mori</i> Egg-Specific Protein and Identification of a Nascent Peptide with Biological Activity	<i>Leslie S. Indrasith, Mika Izuhara, Michihiro Kobayashi, and Okitsugu Yamashita</i>	328

REGULATION OF METABOLISM AND OF ENZYME ACTION

Reevaluation of the "Glycolytic Complex" in Muscle: A Multitechnique Approach Using Trout White Muscle	<i>Stephen P. J. Brooks and Kenneth B. Storey</i>	13
Polyamines Stimulate the Activity of Glycogen Synthase (Casein) Kinase-1 from Bovine Kidney and Different Rat Tissues	<i>Toolsee J. Singh</i>	167
Spermine, Another Specific Allosteric Activator of Calcium Uptake in Rat Liver Mitochondria	<i>Hans Kröner</i>	205
Differential Energetic Metabolism during <i>Trypanosoma cruzi</i> Differentiation. I. Citrate Synthase, NADP-Isocitrate Dehydrogenase, and Succinate Dehydrogenase	<i>Francisco-Javier Adroher, Antonio Osuna, and Jose A. Lupiáñez</i>	252
Diphosphonates Are Potent Inhibitors of Mammalian Inorganic Pyrophosphatase	<i>Irina N. Smirnova, Natalia A. Kudryavtseva, Sergej V. Komissarenko, Natalia B. Tarusova, and Alexander A. Baykov</i>	280

NUMBER 2, DECEMBER 1988

INVITED PAPER

Sulfated Glycolipids and Cell Adhesion	<i>David D. Roberts and Victor Ginsburg</i>	405
--	---	-----

COMMUNICATION

Occurrence in Humans and Guinea Pigs of the Gene Related to Their Missing Enzyme L-Gulonono- γ -lactone Oxidase	<i>Morimitsu Nishikimi, Takuya Koshizaka, Takayuki Ozawa, and Kunio Yagi</i>	842
--	--	-----

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Studies on the Structure of NADH:Ubiquinone Oxidoreductase Complex: Topography of the Subunits of the Iron-Sulfur Flavoprotein Component	<i>Ai-Li Han, Takao Yagi, and Youssef Hatefi</i>	490
Role of Sulfhydryl Groups in Benzoquinone-Induced Ca^{2+} Release by Rat Liver Mitochondria	<i>Gregory A. Moore, Marianne Weis, Sten Orrenius, and P. J. O'Brien</i>	539
Microsomal Reduction of Low-Molecular-Weight Fe^{3+} Chelates and Ferritin: enhancement by Adriamycin, Paraquat, Menadione, and Anthraquinone 2-Sulfonate and Inhibition by Oxygen	<i>Glenn F. Vile and Christine C. Winterbourn</i>	606
The Interaction of Oxymyoglobin with Hydrogen Peroxide: A Kinetic Anomaly at Large Excesses of Hydrogen Peroxide	<i>Kevin D. Whitburn</i>	614
The Enzymatic Reduction of Actinomycin D to a Free Radical Species	<i>W. D. Flitter and Ronald P. Mason</i>	632

Sulfate Anion Free Radical Formation by the Peroxidation of (Bi)sulfite and Its Reaction with Hydroxyl Radical Scavengers	<i>Carolyn Mottley and Ronald P. Mason</i>	681
Superoxide Production in Aprotic Interior of Chloroplast Thylakoids	<i>Masaaki Takahashi and Kozi Asada</i>	714

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Hemipalmitoylcarnitinium, a Strong Competitive Inhibitor of Purified Hepatic Carnitine Palmitoyltransferase	<i>Richard D. Gandour, William J. Colucci, Terry C. Stelly, Paul S. Brady, and Linda J. Brady</i>	515
Purification and Crystallization of Rat Liver NAD(P)H:(Quinone-Acceptor) Oxidoreductase by Cibacron Blue Affinity Chromatography: Identification of a New and Potent Inhibitor	<i>Hans J. Prochaska</i>	529
Purification and Characterization of Thymidylate Synthetase in the Liver of the Mouse Bearing Ehrlich Ascites Tumor	<i>Mineko Asanagi, Yoichi Moriyama, and Shinji Fujimura</i>	749

GLYCOPROTEINS AND GLYCOLIPIDS

One-Step Purification of Murine IgM and Human α_2 -Macroglobulin by Affinity Chromatography on Immobilized Snowdrop Bulb Lectin	<i>Naoto Shibuya, Janice E. Berry, and Irwin J. Goldstein</i>	676
Structural Differences Found in the Sugar Chains of Eutopic and Ectopic Free α -Subunits of Human Glycoprotein Hormone	<i>Takehiro Kawano, Tamao Endo, Ryuichiro Nishimura, Tsuguo Mizuochi, Matsuto Mochizuki, Naohisa Kochibe, and Akira Kobata</i>	787

HORMONE STRUCTURE AND FUNCTION

Insulin-like Growth Factors Maintain Steady-State Metabolism of Proteoglycans in Bovine Articular Cartilage Explants	<i>Frank P. Luyten, Vincent C. Hascall, S. Peter Nissley, Teresa I. Morales, and A. Hari Reddi</i>	416
Structure-Activity Relationships for Glycine-Extended Peptides and the α -Aminating Enzyme Derived from Medullary Thyroid CA-77 Cells	<i>Paul P. Tamburini, Barry N. Jones, Angelo P. Consalvo, Stanley D. Young, Susan J. Lovato, James P. Gilligan, Lawrence P. Wennogle, Mark Erion, and Arco Y. Jeng</i>	623
Quantitative Analysis of Internalization of Glucagon by Isolated Hepatocytes	<i>Edwin M. Horwitz and Ruth S. Gurd</i>	758

LIPIDS AND PROSTAGLANDINS

Metabolism of Arachidonic Acid by Human Nasal and Bronchial Epithelial Cells	<i>David Henke, Roberta M. Danilowicz, John F. Curtis, Richard C. Boucher, and Thomas E. Eling</i>	426
Tissue and Chain Length Specificity of the Fatty Acyl-CoA Elongation System in the American Cockroach	<i>Apollo H. Vaz, Russell A. Jurenka, Gary J. Blomquist, and Ronald C. Reitz</i>	551

Effects of Ethanol Feeding on Hepatic Lipid Synthesis	
<i>Lilian B. M. Tijburg, Alfonso Maquedano, Caspaar Bijleveld, Manuel Guzmán, and Math J. H. Geelen</i>	568
Effects of Ethanol Feeding on the Activity and Regulation of Hepatic Carnitine Palmitoyltransferase I	
<i>Manuel Guzmán and Math J. H. Geelen</i>	580

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

Polyamine Transport in <i>Neurospora crassa</i>	
<i>Rowland H. Davis and Janet L. Ristow</i>	479
Sodium-Calcium Exchange in Membrane Vesicles from <i>Artemia</i>	
<i>Joo Cheon and John P. Reeves</i>	736
Lanthanum as a Calcium-Substituting Ion for Binding to Sarcoplasmic Reticulum ATPase	
<i>Francisco Fernandez-Belda</i>	770

MOLECULAR BIOLOGY, GENE EXPRESSION, AND DEVELOPMENTAL BIOCHEMISTRY

Different Splice Site Utilization Generates Diversity between the Rat and Human Pancreatic Polypeptide Precursors	
<i>Alan S. Kopin, Amy E. Toder, and Andrew B. Leiter</i>	742

OXYGENASES, MICROSOMES, AND P450 REACTIONS

Hepatic Mitochondrial Coumarin 7-Hydroxylase: Comparison with the Microsomal Enzyme	
<i>Paavo Honkakoski, Anneli Kojo, Hannu Raunio, Markku Pasanen, Risto Juvonen, and Matti A. Lang</i>	558
Pyrazole Is Different from Acetone and Ethanol as an Inducer of the Polysubstrate Monooxygenase System in Mice: Evidence That Pyrazole-Inducible P450Coh Is Distinct from Acetone-Inducible P450ac	
<i>Paavo Honkakoski, Seija Autio, Risto Juvonen, Hannu Raunio, Harry V. Gelboin, Sang Shin Park, Olavi Pelkonen, and Matti A. Lang</i>	589
Peroxidation-Dependent and Peroxidation-Independent Mechanisms by which Acetaminophen Kills Cultured Rat Hepatocytes	
<i>John L. Farber, Thomas B. Leonard, Marlene E. Kyle, Dai Nakae, Ada Serroni, and Stephanie A. Rogers</i>	640
Potential in the Intact Rat of the Hepatotoxicity of Acetaminophen by 1,3-Bis(2-Chloroethyl)-1-Nitrosourea	
<i>Dai Nakae, Joseph W. Oakes, and John L. Farber</i>	651
Purification and Properties of Catechol 1,2-Dioxygenase (Pyrocatechase) from <i>Pseudomonas putida</i> mt-2 in Comparison with That from <i>Pseudomonas arvilla</i> C-1	
<i>Chieko Nakai, Teruko Nakazawa, and Mitsuhiro Nozaki</i>	701
Physicochemical Characterization of the Nuclear Form of Ah Receptor from Mouse Hepatoma Cells Exposed in Culture to 2,3,7,8-Tetrachlorodibenzo-p-dioxin	
<i>Rebecca D. Prokipcak and Allan B. Okey</i>	811

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

A Differential Scanning Calorimetric Investigation of the Domains of Recombinant Tissue Plasminogen Activator	
<i>James T. Radek and Francis J. Castellino</i>	776

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

- Changes in the Activities of Various Lipid and Carbohydrate Biosynthetic Enzymes in the Diatom *Cyclotella cryptica* in Response to Silicon Deficiency
Paul G. Roessler 521
- Molecular Characterization of Four Forms of Phosphofructokinase Purified from Potato Tuber
Nicholas J. Kruger, John B. W. Hammond, and Michael M. Burrell 690
- Mapping of Antigenic Domains on Phytochrome from Etiolated *Avena sativa* L. by Immunoblot Analysis of Proteolytically Derived Peptides
Lee H. Pratt, Marie-Michele Cordonnier, and J. Clark Lagarias 723

PROTEIN STRUCTURE AND FUNCTION

- Isolation from Earthworms of a Proteinaceous Chemoattractant to Garter Snakes
Dalton Wang, Ping Chen, Xian Cheng Jiang, and Mimi Halpern 459
- Affinity Labeling of the ATP-Binding Site of Type II Calmodulin-Dependent Protein Kinase by 5'-p-Fluorosulfonylbenzoyl Adenosine
Marita M. King, David J. Shell, and Ann P. Kwiatkowski 467
- Presence of Novel Retinoic Acid-Binding Proteins in the Lumen of Rat Epididymis
David E. Ong and Frank Chytil 474
- Characterization of Type I Collagen from the Skin of Blue Grenadier (*Macruronus novaezelandiae*)
John A. M. Ramshaw, Jerome A. Werkmeister, and H. Allan Bremner 497
- Luminescence from the Carbon Monoxide Derivative of *Agaricus bispora* Tyrosinase
C. Kanagy, J. M. Vanderkooi, and W. D. Bonner, Jr. 668
- Rat Brain Hexokinase: The Hydrophobic N-Terminus of the Mitochondrially Bound Enzyme Is Inserted in the Lipid Bilayer
Guochun Xie and John E. Wilson 803
- Oxygen-17 and Deuterium Nuclear Magnetic Relaxation Studies of Lysozyme Hydration in Solution: Field Dispersion, Concentration, pH/pD, and Protein Activity Dependences
Lazaros T. Kakalis and Ion C. Baianu 829

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

- Diversity of Rat Brain Cysteine Proteinase Inhibitors: Isolation of Low-Molecular-Weight Cystatins and a Higher-Molecular Weight T-Kininogen-like Glycoprotein
N. Marks, F. Stern, L.-M. Chi, and M. J. Berg 448
- Proteolytic Degradation of Protein Kinase C in the Phorbol Ester-Induced Interleukin-2 Secreting Thymoma Cells
Freesia L. Huang, Prince K. Arora, Edgar E. Hanna, and Kuo-Ping Huang 503
- Multicatalytic Proteinase in Fish Muscle
Eduardo J. Folco, Liliana Busconi, Celina B. Martone, and Jorge J. Sanchez 599
- Isolation and Characterization of a Basic Carboxypeptidase from Human Seminal Plasma
Randal A. Skidgel, Peter A. Deddish, and Richard M. Davis 660

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Glycogen Synthesis from Glucose and Fructose in Hepatocytes from Diabetic Rats
Carlos J. Ciudad, Assumpta Carabaza, and Joan J. Guinovart 437

Phosphoserine as a Recognition Determinant for Glycogen Synthase Kinase-3: Phosphorylation of a Synthetic Peptide Based on the G-Component of Protein Phosphatase-1	<i>Carol J. Fiol, Joseph H. Haseman, Yuhuan Wang, Peter J. Roach, Roger W. Roeske, Maria Kowalczyk, and Anna A. DePaoli-Roach</i>	797
AUTHOR INDEX FOR VOLUME 267		847
CUMULATIVE AUTHOR INDEX FOR VOLUMES 260-267		850
CUMULATIVE SUBJECT INDEX FOR VOLUMES 260-267		861

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Gene sequences should be simultaneously submitted to a gene databank. Authors of papers describing new structure determinations are requested to submit to the Protein Data Bank all of the structural data required to validate the discussion, including both x-ray amplitudes and phases and the advised atomic coordinates.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. SUSI, H., AND BYLER, D. M. (1987) *Arch. Biochem. Biophys.* **258**, 465–469.
2. BOVEY, F. A., AND JELINSKY, L. W. (1983) *Chain Structure and Conformation of Macromolecules*, p. 150, Academic Press, New York.
3. BRITTON, G. (1985) in *Methods in Enzymology* (Law, J. H., and Rilling, H. C., Eds.), Vol. 111, pp. 113–149, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

ANNOUNCEMENT

Walter J. Johnson Prize

For the Encouragement of Postdoctoral Research

The Board of Directors of Harcourt Brace Jovanovich, Inc., has established the Walter J. Johnson Prize to be awarded to a deserving individual or individuals having recently completed doctoral studies in the life sciences. The award was established in recognition of Mr. Walter J. Johnson, founder of Academic Press (a division of Harcourt Brace Jovanovich), who has engaged in a lifelong dedication to excellence in scientific publishing. The editorial administrators of three Academic Press journals have been vested with the authority to select the recipients of the Walter J. Johnson Annual Prize: *Archives of Biochemistry and Biophysics*, *Experimental Cell Research*, and *Journal of Molecular Biology*.

A prize of \$10,000 will be awarded by the Editorial Committee of *Archives of Biochemistry and Biophysics* every three years (next in the spring of 1990) to one or more individuals who have recently completed their doctoral studies in the life sciences.

The following guidelines will apply in the selection of recipients of this award:

1. The nomination should be based on the quality of a paper published in *Archives of Biochemistry and Biophysics* during the preceding three years. The nominee must have been the first-listed author.

2. The nominee should have received his/her Ph.D. or M.D. no more than five years prior to the publication date of the article.

3. The Prize may be awarded to one nominee or divided among several nominees.

4. Nominations should be made in writing to the Chairman of the Editorial Committee by a member of the Editorial Board of *Archives of Biochemistry and Biophysics*. Nominations must be submitted by December 31, 1989.

5. Selection will be made by a Committee of Executive Editors of *Archives of Biochemistry and Biophysics*.

6. Awards will be presented next in the spring of 1990 during the dinner meeting of the Editorial Board of *Archives of Biochemistry and Biophysics* held during the Annual Meeting of the ASBMB.
